regulation ⚠

ANÆ tree grate model Dommel

tree grate height: 4cm

Installation and maintenance may be only performed with original components.

The national and international rules must be used. ANAE Streetfurniture is not responsible for damage caused by improper use. Installation has to be done by qualified personnel.

Tree grates may only be used for prescribed purpose.

Vehicle pressure may not be applied to the treegrates before completion of assembly protocol.

When, using M12 sets, the surface of the grates is not level across the segments after placement M10 sets need to be applied. ANAE can supply these sets.

The images in this document are indicative for the model. Some discrepancies between image and product may occur with different model and sizes.

Attention:

With grates larger than 2 meters support tiles need to be applied around the opening in the grate.

Only by properly installing the system, a traffic class B for cars according to NEN-EN 1991-2: 2003 has been achieved.

assembly steps

ANÆ tree grate model Dommel

tree grate height: 4cm

Place Foundation

Curbstones of 250x150x1000 or similar (not included) all around. Where necessary provide gaps for roots. After checking that the curbstones are level set them in concrete.

pic. 5
Foundation

Place frame

Place the ANÆ light or heavy frame on the curbstones. Pay attention to the total height! See sections.

pic. 6
Frame

Temporary wooden beams

To be able to place and assemble the tree-grate based on manpower alone we suggest placing wooden beams on the frame. These beams allow access to the connection holes of the grate's segments. Attention! the beams need to be placed inside of the raised strip of the frame.

assembly steps

ANÆ tree grate model Dommel

tree grate height: 4cm

Place Tree-grate
Place the grate segments on top of the wooden beams and interconnect them.

pic. 8
Tree-grate on wooden beams

Remove beams
By using a crowbar, or something similar, lift the interconnected grate segments so that you can remove the beams from underneath the grate.

pic. 9
Placing the grate

Finish pavement
Check to make sure the grate lays inside the raised strips of the frame. If so finish placing the pavement.
